

A **Blueprint** for Health Records Research in Scotland

APPENDIX 3

SHIP INTERNATIONAL ADVISORY BOARD MEMBERS

Dr Philip Burstein M.D.

Philip Burstein is Vice President of Healthcare Data Optimization and Data Stewardship Operations within Drug Development Sciences, Medicines Development, R&D, GlaxoSmithKline. He also leads eHli, the electronic Healthcare Information initiative, which is a group interested in promoting GSK's ability to fully utilize electronic health records in clinical research.

Mr Ian Crichton

Ian Crichton has had an international business career spanning 20 years and joined NHS National Services Scotland as Chief Executive in 2007. He has experience of leading large strategic agendas, with a particular emphasis on taking forward complex organisational change.

Professor Janet H Darbyshire

Janet Darbyshire trained in respiratory medicine, working in tuberculosis and HIV infection. In 1998, she became the Director of the MRC Clinical Trials Unit. In 2005 she was appointed Joint Director of the UK Clinical Research Network now the NIHR Clinical Research Network. She has served on many advisory groups including the Commission on Human Medicines.

Professor C. D'Arcy J. Holman

As Professor of Public Health at The University of Western Australia, D'Arcy Holman developed the world-class WA Health Data Linkage System. He received the Centenary Medal of Australia for his voluntary services to the health system and the Sydney Sax Public Health Medal for lifetime achievement in his field.

Dr William W Lowrance PhD

William Lowrance is a consultant in health research ethics and policy with focus on the use of health information and biospecimens in research. He has prepared reports for The Nuffield Trust, the Medical Research Council and the Wellcome Trust and conducted a project for the U.S. National Human Genome Research Institute.

Mr David Neal

David Neal is the Head of Policy and Deputy Director at the National Research Ethics Service (a division of the National Patient Safety Agency in England), with particular responsibility for ethics committee procedure, the Integrated Research Application System and collaborations with regulatory bodies. He won a Butler Trust Award for his work leading the development of Prison Service policy.

Professor Jaakko Tuomilehto

Jaakko Tuomilehto is Professor of Public Health at the University of Helsinki, Finland and winner of numerous prestigious awards. Has been involved in a number of key cardiovascular prevention studies and initiated the Finnish Diabetes Prevention Study, the landmark study for the primary prevention of type 2 diabetes.
